PROFESSIONAL SUMMARY

NTU M.Sc. Analytics graduate (CGPA 4.60) with hands-on experience building reproducible ML pipelines and causal inference models. Proficient in Python, R, and SQL, with a solid foundation in statistical analysis and NLP engineering. Passionate about leveraging advanced analytics and machine learning to solve complex business problems and drive data-informed strategy.

EDUCATION

Nanyang Technological University (NTU), Singapore **Aug 2025 – Jun 2026 (Expected)**
MSc in Analytics / CGPA: 4.60/5.00

Relevant Modules: *Data Mining (A+), Database System (A), Statistical Modelling & Data Analytics (A)*

Guangdong University of Foreign Studies (GDUFS), China **Sep 2021 – Jun 2025**
BSc in Statistics / CGPA: 3.90/4.00 (top 4%, Degree with Distinction)

Awards: National Prize in Market Research (2023); Provincial Prize in Statistical Modelling (2023)

WORK EXPERIENCE

DataStory Co., Ltd. — Data Analyst Intern | *SQL, ABSA, ESG Analytics* **Jan 2025 – Jun 2025**

- Designed 10+ Tableau dashboards via SQL for FMCG Personal Care campaign tracking, proposing an optimized budget allocation plan that identified a 15% reallocation opportunity between Body Lotion and Sunscreen based on seasonal data trends.
- Implemented an Aspect-Based Sentiment Analysis workflow using Python. Benchmarked TF-IDF baseline against BERT models, achieving 75% accuracy on 50,000+ reviews.
- Supported ESG monitoring initiatives by constructing a quantitative Social Sentiment Index, providing the team with measurable indicators to track brand reputation trends.

Data Analysis Studio — Student Team Leader | *Entrepreneurship, NLP* **Jun 2023 – Jun 2024**

- Coordinated a diverse team of analysts to deliver 30+ consulting projects, including user segmentation and causal inference models, achieving 100% on-time delivery.
- Conducted a comparative study on time-series forecasting using 14 years of daily financial data. Built and evaluated ARIMA and GM (1,1) models in R and SAS, optimizing RMSE and MAPE metrics (A+ grade).
- Led a social governance NLP initiative, building reproducible Python pipelines to transform 20K+ unstructured records into 7 standardized metric categories, securing provincial funding and a “Challenge Cup” Silver Medal.

RELEVANT PROJECTS

Bank Subscription Prediction | *XGBoost, Classification, Model Evaluation* **Sep 2025 – Nov 2025**

- Led an 11-member team to solve a highly imbalanced (10% positive class) bank subscription classification problem on 45k+ customers, integrating Customer Acquisition Cost (CAC) constraints to optimize business value.
- Developed a robust benchmarking pipeline comparing 11 algorithms (including XGBoost, LightGBM, GLM, LDA), employing Precision-Recall and MCC metrics to address class imbalance.
- Translated model evidence into 3 deployment regimes across lifecycle stages, recommending LightGBM for recall-driven growth; project earned an A+ grade with professor commendation.

Electric Vehicles: Green or Trade-Off? | *Panel Data, Causal Inference* **Dec 2024 – Apr 2025**

- Engineered a large-scale, spatial-temporal dataset (spanning 31 geographical regions over 4 years) by integrating and cleaning multi-source heterogeneous data using Python (Pandas/NumPy).
- Quantified causal effects of EV policies on emissions using Two-Way Fixed Effects and 2SLS Instrumental Variables, effectively mitigating endogeneity and selection bias.
- Identified critical "clean-grid thresholds" (e.g., > 40% renewable mix) for positive environmental ROI, providing actionable policy recommendations; awarded "Excellent Graduation Thesis" (A+).

KEY COMPETENCIES

Languages: English (Fluent), Mandarin (Native)

Technical Skills: Python (Pandas, NumPy, Scikit-learn), R, SQL, Git, Supabase Backend Integration, Power BI.

Analytics Skills: Supervised & Unsupervised Learning, NLP, Time-Series Analysis, Feature Engineering.

Professional Skills: Data Storytelling, Stakeholder Communication, Cross-Functional Collaboration.
